recommend that a cost-plus-fixed-fee type of contract be issued for this system. Under such a contract specific decisions affecting capability versus cost may be answered by your people to fit your problems and objectives as we both come to understand the overall problem better. Otherwise we would be forced at this point to freeze a set of specifications when we know least about your applications and you know least about the benefits and penalties of individual specification items. Accordingly, we are submitting herewith our revised Cost Proposal which supersedes our Cost Proposal dated 27 November 1962.

We are looking forward with pleasure to the opportunity to work with you in this program. If we can supply you with any additional information or assist you in expediting the award of this contract please let us know.

Yours very truly,

STATOTHR
